PROFILE

Senior Frontend Engineer with 7+ years of experience building scalable, performance-critical web applications using React, Next.js, and TypeScript. Strong focus on frontend architecture, performance optimization, accessibility, and developer experience. Proven track record in trading platforms, admin dashboards, and high-traffic products. Experienced in cross-functional collaboration with backend, blockchain, and design teams in product-driven environments.

CORE SKILLS

Frontend: React, Next.js (App & Pages Router), TypeScript, JavaScript (ES6+), HTML, CSS

State & Data: Redux, Context API, REST APIs

UI & UX: Tailwind CSS, Material UI, Ant Design, GSAP, Storybook

Testing: Jest, React Testing Library

Performance & Quality: Lighthouse, Core Web Vitals, SEO, Accessibility (WCAG)

Other: Electron, Vite, Git, GitHub, Figma, Google Analytics, Vercel

PROFESSIONAL EXPERIENCE

Frontend Developer, Dextrading August 2024 - September 2025

- Designed and integrated TradingView Advanced Charting Library with real-time OHLC updates, improving data freshness while avoiding full chart re-renders.
- Built 2 admin dashboards and 1 internal application, focusing on scalable component architecture and maintainable codebases.
- Optimized performance and accessibility, increasing Lighthouse scores from ~30 to 100 and accessibility from ~40 to 96.
- Collaborated closely with backend and blockchain teams to integrate APIs and trading data pipelines.
- Improved SEO and page structure, enhancing search visibility and user engagement.

Frontend Developer, QUBY June 2021 - July 2024

- Engineered a production web application serving 50,000+ users, focusing on reliability and performance.
- Led frontend development across 3 IoT-related projects (vending machines, remote elevators).
- Mentored and coached a frontend intern, conducting regular code reviews and architectural discussions.
- Collaborated with designers and backend engineers to deliver cohesive, user-centric interfaces.
- Conducted daily 1:1 code reviews, providing timely feedback and best-practice guidance.
- Integrated Google Analytics to track user behavior and inform product decisions.

Frontend Developer, DATIS Tech December 2019 - May 2021

- Developed 3 admin dashboard templates used across multiple internal products.
- Reduced page load times by approximately 40% through rendering and asset optimization.
- Worked in large codebases across 4+ projects, emphasizing readability and long-term maintainability.

- Designed 3 dashboard admin panels for warehouse and distribution functions.

Frontend Developer, yomoBit UG January 2019 - December 2019

- Mentored junior frontend developers and led cross-browser/device compatibility testing.
- Led comprehensive compatibility testing across devices and browsers.
- Built a cross-platform financial application using Angular and Electron for Windows and macOS.
- Delivered multiple internal projects using Angular and React.
- Developed an e-commerce platform with an admin panel using Angular and Ionic.

Intern Frontend Developer, Nilasoft January 2017 - January 2019

- Implemented responsive UIs in collaboration with UI/UX designers and backend developers.
- Contributed to frontend development and testing for 2+ production websites.

EDUCATION

B.Sc. Mechanical Engineering – University of Guilan

September 2014 - June 2019

COURSES

MERN Stack, Udemy

April 2024 - June 2024
